From the Basque Country—a stateless nation divided between Spain and France—we send you fraternal greetings on behalf of the Euskal Herria–Donbass Solidarity Committee. It is a pleasure to have received the ACP's invitation to speak at your 2nd National Congress.

As you may know, our Committee has been engaged in internationalist work in solidarity with the people of Donbass for over 12 years, grounded in an anti-imperialist and anti-fascist perspective. Throughout these years, we have consistently denounced imperialist interference in the internal affairs of Ukraine and the Russian Federation—interference that lies at the root of the war that has been ravaging Eastern Europe since 2014. We continue this work of denunciation today.

Just as we advocate for the Basque Country, we have championed the right to self-determination for Donbass—a concept so masterfully articulated by Lenin in his work *The Right of Nations to Self-Determination*.

Furthermore, in these times of rising neo-fascism (a fascism that, in reality, never went away), we can proudly say that over these long 12 years, we have helped raise awareness about the anti-fascist resistance waged by the people of Donbass—much like the thousands of Basques who fought in the war of 1936, or the 2,500 Americans of the Abraham Lincoln Battalion on Spanish soil.

We wish you great success in your struggle within the belly of the beast against capitalism-imperialism and in defense of social justice.

For the self-determination of peoples!

Long live the internationalist struggle! Down with imperialism!

For anti-fascist unity!
