Dear comrades,

On behalf of the Danish Communist Party, we send our warmest greetings and our best wishes for a successful congress.

The world is going through extraordinary changes not seen in a century. With the emergence of a multipolar world order, the ability of the imperialist nations to plunder the Global South is steadily being weakened. This new era creates not only a heightened necessity for change, but also new possibilities for achieving it.

What is needed is a strong and disciplined communist party, capable not only of breaking down the ideological walls constructed by the bourgeoisie to mystify the objective interests of the working class, but also of bringing forward the comrades capable of building an alternative that secures the interests of the working class.

The framework for such an alternative is developed and given new energy at party congresses.

A socialist alternative also requires international connections and solidarity. The recent actions and machinations of the US and Danish governments to further militarize Greenland and anchor the people of Greenland within the decaying unipolar world order are a concrete example of why this is necessary.

The Danish media has gone into overdrive to downplay the newest agreement between our respective countries, presenting it as simply more of the same. But the new agreement is qualitatively different from the 1951 agreement. It not only creates a legal framework that further binds Greenland to US imperialism but also risks cutting Greenland off from the possibilities for independent development opened by an emerging multipolar world order.

Even though the US government is the only government threatening Denmark economically and militarily, our government and its media continue to frame Russia and China as the threats to our security and insist that we must prepare for war.

This has paved the way for the Danish government, for only the second time in modern Danish history, to allow a foreign power to establish a lasting military presence within Denmark itself. The last comparable rupture with Danish sovereignty took place under the collaborationist Social Democratic-led government during the Nazi occupation. Our struggles are therefore concretely connected.

We therefore hope that your congress contributes to building the kind of capable and disciplined party needed to confront and overcome the contradictions facing us all.

We look forward to hearing about the outcomes of your congress.

With comradely greetings,

Kaivon Kjems

International Secretary

Danish Communist Party
