Unofficial translation

On behalf of the Socialist Political Party **A JUST RUSSIA**, I extend my heartfelt greetings to the participants of the 2nd Congress of the American Communist Party.

Our parties are bound by our joint work at the origins of the international socialist network "SOVINTERN." The American Communist Party was one of the co-founders of this initiative together with the party **A JUST RUSSIA.** In April 2026 representatives from over one hundred socialist, social-democratic, and progressive parties and movements from seventy countries gathered in Moscow for the founding Forum, "SOVINTERN — For Socialism in the 21st Century." The participation of American communists in this historic event was a significant contribution to the cause of restoring genuine international solidarity.

We are of the view that the modern world is undergoing a profound transformation. The remnants of neocolonialism, the policy of double standards, and bloc-based thinking lead to growing inequality, conflicts and mistrust between peoples. That is precisely why we established "SOVINTERN"— not as a repetition of old organizational forms, but as an open, equitable platform for 21st-century socialists. It enables socialists from around the world to communicate freely, exchange experiences, and build international communities of solidarity and political activity.

The cooperation between the American Communist Party and the party **A JUST RUSSIA** is an example of a new type of inter-party relations based on mutual respect, consideration of national specifics and commitment to common goals: social justice, protection of the rights of working people, genuine national sovereignty and peace.

I am convinced that your Congress will become an important milestone in the life of the party. Amidst growing political polarization in the United States, the voice of American communists is carrying increasing weight. Together with you and other partners within SOVINTERN, we will continue to strive for the establishment of a multipolar, just world order based on international law, indivisible security, and respect for the right of peoples to determine their own path of development.

I wish the delegates and guests of the Congress fruitful work, substantive discussions, and further success in the struggle for social progress and peace.

With best comradely greetings,

Chairman **Sergey Mironov**
