Bellinzona (Switzerland), 3.10.26

Greeting on the 2nd national congress of your party

Dear comrades,

the Communist Party (Switzerland) wishes you good work in these trying times of war preparation by the forces of capital.

In Switzerland we are fighting to preserve our country's neutrality and non-alignment against the warmongering élites of NATO and the European Union. The war they prepare against Russia here in Europe is a crusade against the multipolar world and the Global South and especially against the uprise of China and the BRICS.

In this context, we need to unite the working class under the banner of peace, national sovereignty and equality though the patriotism of the popular masses. These pillars are inseparable from one another and should be our rallying cry against the useful idiots – or imperial collaborators – of the liberal left.

May your work bring about a better future for the north American working class.

Revolutionary greetings,

Communist Party (Switzerland)
