To the American Communist Party (ACP)

Dear Comrades of the **American Communist Party,**

Warm and revolutionary greetings from the Swiss Communist Youth.

We express our full support for your Congress and for your political activity. In the current international context, with a growing risk of global conflict caused by Western imperialist policies, and in the local context where movements like ours and yours operate, with a progressive limitation of democratic freedoms and freedom of thought, it is of fundamental importance to build a solidarity network among revolutionary movements.

As Swiss Communist Youth, we currently consider the development of a multipolar world, which is necessary for the emancipation of all peoples and the establishment of equitable relations between different countries, to be a priority. We are at the forefront of the fight for the rights of young workers and students, and we firmly oppose the warmongering campaign promoting rearmament pushed by NATO and the European Union. We will continue to defend Swiss neutrality, which is synonymous with national sovereignty and allows our country to mediate in conflicts and play a role in the emerging multipolar world.

We wish you a successful Congress and reiterate our full solidarity with your political activity,

Revolutionary Greetings,

Adam Barbato-Shoufani
General Secretary of the
Swiss Communist Youth
